The application has been amended as follows:

1) In the specification, page 1, before the 1st line, following is inserted:

- - This application is a 371 of PCT/JP03/06959, filed 06/02/2003. - -

2. The following is an examiner's statement of reasons for allowance: The closest prior arts are Muller et al and Matsuo et al. Muller et al do not teach the use of an optically active amine in the production of their compound 1. The reference uses racemic bromopropiophenone and a racemic amine. The reference does not teach production of optically active aminoketone, see page 451, lines 23 onwards. Muller et al also does not teach use of methanesulfonic acid for the separation. Matsuo uses methanesulfonic acid for preparing aminoalcohol, and not aminoketone. Thus, combination of reference fails to render obvious the instant claimed process of obtaining optically active aminoketone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
